Rotary  | 

Polio Eradication  
Let's be Part of the Solution

# POLIO INFOGRAPHICS

**PROTECT YOURSELF AND YOUR LOVED ONES FROM POLIO**

- Ensure your child is vaccinated multiple times
- Wash your hands regularly with soap and water
- Use a toilet
- Consume food that is fully cooked
- Drink safe water\*

\*If the safety of your water is in doubt, boil it.

## 5 REASONS WHY WE MUST ERADICATE POLIO

- YOUR GIFT WILL IMPROVE LIVES.**  
 Today, 19 million people who would otherwise be paralyzed by polio are walking, and 1.5 million people who would otherwise have died are alive.
- YOUR GIFT WILL INVEST IN THE FUTURE.**  
 If all eradication efforts stopped today, within 10 years, polio could paralyze as many as 200,000 children each year. A polio-free world will be a healthier world for children everywhere.
- YOUR GIFT WILL IMPROVE CHILD HEALTH.**  
 Polio surveillance networks and vaccination campaigns also monitor children for other health problems, like vitamin deficiency and measles, so we can address them sooner.
- YOUR GIFT WILL LOWER HEALTH CARE COSTS.**  
 The global effort to eradicate polio has already saved more than \$27 billion in health care costs since 1988, and expects to save \$14 billion more by 2050.
- YOUR GIFT WILL MAKE HISTORY.**  
 Polio eradication will be one of history's greatest public health achievements, with polio following smallpox to become only the second human disease eradicated from the world.

At the end of the 1980s, more than 350,000 children were paralyzed by polio every year. Today, Rotary and its partners have reduced the incidence of polio by 99.9 percent. However, until we see the last of the poliovirus, eradication efforts need additional funding to:

- IMMUNIZE** more than 400 million children against polio every year
- IMPROVE** disease surveillance systems to detect any poliovirus in a person or the environment
- HIRE** more than 150,000 health workers to go door to door to find every child

## LET'S FIGHT POLIO

**What You Should Know About Polio**

- Polio mainly affects children under 5
- There's no cure for the disease, but it can be prevented by vaccination
- Since 1988, polio cases in the world have reduced by 99.9% thanks to the work of everyone
- There are only two countries left where polio is still endemic
- As long as there's a case of polio in the world, all unvaccinated children are at risk of becoming infected

**We're one step away to #EndPolio. Let's keep vaccinating our children!**
