## PRESIDENT'S CORNER

Fellow life-changing rotarians, the wheel of Rotary continues to spin amidst this devastating pandemic. As the days go by, we continue to serve and look forward towards recovery through our programs and advocacies. May we always be reminded to continue to serve above one's self.

-Eric Brylle Adlawan, RCCNC President

## RCCNC JOINS COASTAL CLEANUP DRIVE & MANGROVE PLANTING

Members of the Rotary Club of Cebu Naga Central collaborates with the Parish Youth Coordinating Council of the Archdiocesan Shrine and Parish of Saint Francis of Assisi in Naga, Cebu in facilitating the coastal clean-up and mangrove planting activity as one of the many activities of the parish in preparation of the feast day of the city's patron — Saint Francis of Assisi known as the saint for ecology. Over 50 youth and rotarians came in the early morning of

October 2, 2021 at Oceanside, South Poblacion, Naga, Cebu to help clean the shoreline line and planted over 500 mangrove propagules in the little mangrove forest. The area has long

been supported by the Rotary Club of Cebu Naga Central, Apo Cement Corporation (CEMEX Philippines) and the Barangay South Poblacion. In the past 6 years, it is the venue for the district-wide mangrove planting participated by areas within Metro Cebu. Mangroves are trees and shrub species that grow at the interface between land and sea in tropical and subtropical regions of the world, where the plants exist in conditions of salinity, tidal water flow and muddy soil.

DISEASE PREVENTION AND TREATMENT

### RCCNC OBSERVES BREAST CANCER AWARENESS MONTH VIRTUALLY.

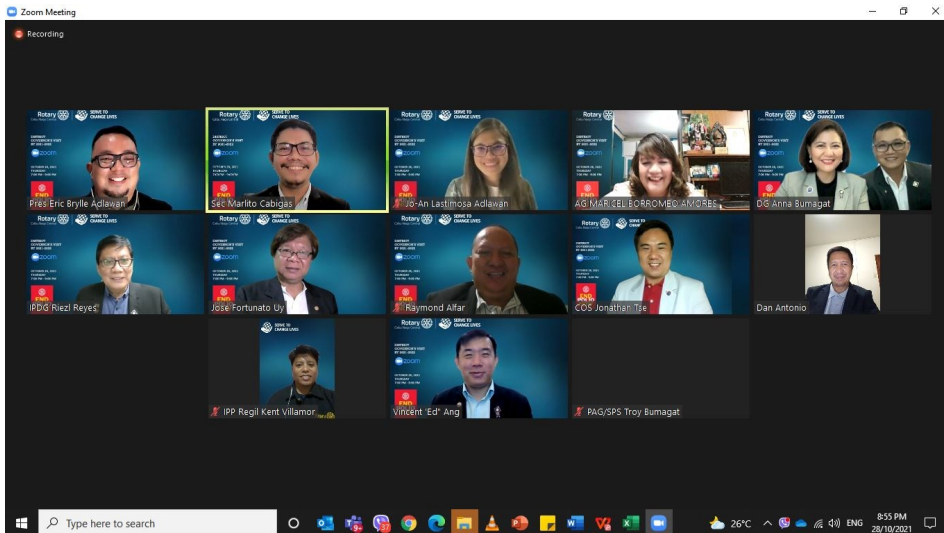

Due to the ongoing pandemic, RCCNC roll out an online campaign in celebration of the breast cancer awareness called Pink October for a week in it's facebook page: [facebook.com/RCCNagaCentral](https://www.facebook.com/RCCNagaCentral). Breast Cancer Awareness Month, marked in countries across the world every October, helps to increase attention and support for the awareness, early detection and treatment as well as palliative care of this disease. Currently there is not sufficient knowledge on the causes of breast cancer, therefore, early detection of the disease remains the cornerstone of breast cancer control. When breast cancer is detected early, and if adequate diagnosis and treatment are available, there is a good chance that breast cancer can be cured. If detected late, however, curative treatment is often no longer an option.
