President's Time	Press Carmencita Zurita
Adjournment	Press Carmencita Zurita

Master of Ceremony

Dir Andrea Jamias

Let us Pray

Heavenly Father, as we gather tonight at this meeting we ask that You will be in our midst. Help us to make decisions that will be pleasing to You. Help us to be able to discuss the matters at hand in a reasonable way, and to be willing to give up having our own way.

God let this meeting be productive and, as should be the case in all areas of our lives, help us to keep You at the forefront of our minds as we do the work set before us.

We ask these things in your name, Amen.

President's Column

PRES. CARMENCITA R. ZURITA

RY 2019-2020

My Fellow Centralites ,Spouses and Guests,

It has been a busy quarter that has just passed . After a whirlwind of activities , I had a short respite right before getting immersed in other endeavors. Three months into this rotary year is a good time to self -assess — are we on track with the plans we are set out to do? The Rotary Citation ,which I am attaching ,is a good tool to track our progress. I have lots of plans for our club ,one of which is to avail of global and district grants but I also know this will involve tremendous amount of work and commitment on my part to pull off. But I know that being in a vibrant club , I am guaranteed of your wholehearted support ,I can not do this solo. I really need your help fellow Centralites and spouses.

Lately,I have been busy practising for our presentation in the forthcoming Governor's night this coming friday ,November 15 in Pinnacle Hotel. Its a Latina Mardi Gras Affair. Our very own PT Neneng Cañete together with RC North Sec Joseph Carandang will be the hosts for the night. Be ready to be mesmerized by our 7 minute show by the club presidents and secretaries of Area 2 clubs. And wait!there is more! We have a surprise number by one of our club members . So please attend the Governor's Night and lets party! Looking forward for a good number of attendees from our club!

Tonight we have two main events, Firstly Rotarian Lalaine Valmores , a lady I truly admire , will be having her classification talk and Secondly , we will be celebrating the birthday of PP Arthur Escalante, the gentleman that I also idolize ,together with IPP Michael Zurita.

So lets relax and have a good time tonight.

Thank you and God bless us all!

Classification Talk

RTN. LALAINE VALMORES Profile

- Bachelors degree in Psychology
- 8 years employed in the field of sales and marketing
- 8 years with Usana as an Independent Distributor and Top Earner
- Business Coach- Helping people earn their first million in Usana.
- Passionate about health and fitness, loves to travel and a pet owner of 3 dogs and 18 cats.

Rotary Foundation named World's Outstanding Foundation for 2016

Rotary Foundation Trustee Chair-elect Paul Netzel accepts the Award for Outstanding Foundation, on Rotary's behalf, at the Association of Fundraising Professionals 2017 conference.

The Association of Fundraising Professionals recognized The Rotary Foundation with its annual Award for Outstanding Foundation at its 2017 conference in San Francisco.

The announcement came on 15 November, known to industry professionals since the 1980s as National Philanthropy Day. The award was presented 2 May at the AFP's annual conference.

Rotary Foundation Trustee Chair-elect Paul Netzel accepted the award on Rotary's behalf, and Eric Schmelling, Rotary's chief philanthropy officer, also attended the conference. The event drew more than 3,400 senior-level fundraising professionals from 33 countries.

"In our Centennial year, we are deeply honored to receive this recognition from the Association of Fundraising Professionals," said Netzel.

AFP's committee of judges cited Rotary's comprehensive campaign to eradicate polio as a major driver of the selection.

"With the generous support of our members and partners, we've taken on some of the toughest humanitarian challenges in the world, none more so than the devastating disease of polio," said Netzel. "We will defeat polio, and it will be a landmark achievement for global public health."

The committee also mentioned that Rotary applies a methodical, purposeful approach to support a wide variety of causes, from providing clean water to educating the next generation of peace professionals.

"This award helps to spread our belief that service to humankind truly changes our world, and for that reason, it is the greatest work of life," said Netzel.

Update on the October 2019 Cotabato Fault System Earthquakes series

What is happening in Cotabato and vicinity?

As of 07:00 AM Philippine Standard Time (PST) of 08 November 2019 (Friday), the total number of earthquakes recorded since the 29 October 2019 Magnitude 6.6 earthquake event is now 2226, with 917 plotted and 161 felt at various intensities. Figure 1 shows earthquake plots as of 07 November 2019 (6PM).

Another DOST-PHIVOLCS Quick Response Team (QRT), consisting of geologists, civil engineers, seismologists and information officers, was immediately deployed on 30 October 2019. The team will investigate geologic impacts, assess structural damages, establish additional portable seismic stations in the vicinity of the earthquake epicenters to augment existing DOST-PHIVOLCS seismic monitoring network (Figure 2) to monitor and study ongoing occurrence of earthquake events, and conduct intensity surveys and information education campaigns and briefings with local DRRMOs and residents of affected communities. A day after the QRT was deployed, the area experienced another Magnitude 6.5 earthquake on 31 October 2019.

Preliminary assessments of the DOST-PHIVOLCS QRT for the cumulative hazards and impacts of the strong earthquakes (Greater than Magnitude 6) are summarized below.

What can we expect from the current earthquake activity?

Minor to moderate-magnitude earthquakes may be expected to occur in the vicinity of the epicentral area and may persist for several days to weeks, with the possibility of some being felt at various intensities. Although the occurrence of another earthquake greater than M6.6 cannot be discounted, the possibility of it coming from the same source is low.

What other hazards should be considered?

The continuing ground shaking due to the aftershock events could still put slightly- to moderately-damaged structures to further damages. Other seismic hazard considerations include remobilization of landslide deposits, possible flashfloods resulting from damming of rivers and potential breaching, and road cut-off. Liquefaction effects such as presence of fissures, sandboils and lateral spreading may affect foundations of buildings, as well as the quality and depth of the water table.

What should be done by the affected communities?

As previously advised, people are reminded to be cautious of structures that are visibly weakened by ground shaking during the 16 October 2019 M6.3, the 29 October 2019 M6.6 and the 31 October 2019 M6.5 earthquakes. Stringent inspection of damaged structures after these earthquakes should be done by local building officials to determine if these are still safe for long-term occupancy.

Considering the magnitude of the structural damages, civil engineers from other government agencies and professional organizations are strongly urged to assist the affected communities in inspecting buildings, monuments and infrastructures to determine their integrity, and to provide recommendations and appropriate actions to the affected groups or individuals.

Areas with visible evidence of tension/incipient cracks that resulted from the strong ground shaking should be closely monitored and avoided, if possible, as these may be aggravated by ongoing earthquake activity. Rains may also render slopes more susceptible to landslides.

Preparedness of communities is highly encouraged and people are enjoined to protect themselves by doing the “drop, cover and hold” procedure during a strongly felt earthquake.

Individuals are likewise advised not to forward or pass on rumors and messages from unconfirmed and unreliable sources related to earthquakes, tsunami or volcanic eruptions as these may only cause undue panic to the populace.
