## Prayer

Dear Father in heaven,  
grant that we may come into your presence as your children. Give to us all that we need each day, so that we are no longer caught in the turmoil of life but can receive your peace. For you care for us as your children, and we are allowed to go confidently through all the troubles of these times because our way leads to you, the eternal Father in heaven. Keep us from going astray and from spending our efforts on what is temporal and cannot last. Let your light strengthen us in what is of heaven, in what is eternally true for our lives.  
Amen.

President, RY 2020-2021

Good afternoon fellow Downtowners and Guests.. Every day mothers risk their lives giving birth and millions of children die each year from treatable, preventable causes. At least 7 million children under the age of five die each year due to malnutrition, poor health care, and inadequate sanitation. To help reduce this rate, we provide immunizations and antibiotics to babies, improve access to essential medical services, and support trained health care providers for mothers and their children. Your Rotary projects ensure sustainability by empowering the local community to take ownership of health care training programs.

In celebration of the Maternal and Child Month, The Rotary Club of Downtown Davao invited our partner is service-LATCH DAVAO to give us a talk on "Breastfeeding during Covid 19 Pandemic" Thank you in advance to our Speaker for gracing our Invitation. Thank you and Good afternoon.

16th Regular Meeting Maternal and Child Month: Breast Feeding During Covid-19 Pandemic".

Breastfeeding is the cornerstone of infant and young child survival, nutrition and development and maternal health. The World Health Organization recommends exclusive breastfeeding for the first 6 months of life, followed by continued breastfeeding with appropriate complementary foods for up to 2 years and beyond.1 Early and uninterrupted skin-to-skin contact, rooming-in2 and kangaroo mother care3 also significantly improve neonatal survival and reduce morbidity and are recommended by WHO.

However, concerns have been raised about whether mothers with COVID-19 can transmit the SARS-CoV-2 virus to their infant or young child through breastfeeding. Recommendations on mother-infant contact and breastfeeding must be based on a full consideration of not only of the potential risks of COVID-19 infection of the infant, but also the risks of morbidity and mortality associated with not breastfeeding, the inappropriate use of infant formula milks, as well as the protective effects of skin-to-skin contact. This scientific brief examines the evidence to date on the risks of transmission of COVID-19 from an infected mother to her baby through breastfeeding as well as evidence on the risks to child health from not breastfeeding.- WHO 2021

The Rotary Club of Downtown Davao invited LATCH Davao ( Non-Government Organization) that supports and help post-partum and breastfeeding mothers and babies.
